

21.2.2012

Khader Adnan Mussa creates history, a Palestinian history.

Being an administrative prisoner, detained without charge, he started a hunger strike until he will be released or being charged. This is the only way for him to fight this unjust and cruel detention. Khader is ready to die for his dignity as a person, for his freedom as a Palestinian. That is his enormous force.

He is unwilling to let the prison's doctors to get near to him, he doesn't trust them. After a long struggle with the authorities, PHR-IL managed to get a permit for a PHR-IL doctor to examine him and to look after his fading health. Kader doesn't allow publishing publicly his medical reports as he sees it as a violation of his privacy. We fully respect his wish.

Freedom fighters all over the world should join Khader's fight for freedom and dignity. Raise your voice now, before it will be too late.

Ruchama Marton, MD  
President and Founder of PHR-IL
